Spire

An integrated accounting and inventory management solution to improve efficiency and maximize profitability.

Modules

A set of features to help you gain visibility, streamline operations and take control of your business.

Accounts Payable
The Accounts Payable module gives you control over the payables process to help manage cash flow requirements, maintain vendor relationships, track payables and reduce administrative costs.

Accounts Receivable
The Spire Accounts Receivable module will simplify the invoice and payment collection process to minimize overdue credit. Set up alerts to identify and track potential problem accounts.

Account Reconciliation
With the Account Reconciliation module, you can easily monitor all transactions and adjustments, while reconciling bank statement items with the General Ledger.

Bill of Materials
For kitted or manufactured items, the Bill of Material module will define which components are used and how many of each are required for a finished product.

Calendar
The Calendar module integrates with the Communications module, allowing users to view and manage their to-do lists from one screen.

Communications
A versatile tool to create notes, alerts and lists. Use the Communication module to set up reminders and lists to prioritize tasks.

Customers
The Customer module stores customer information, including shipping information and sales order history. Get quick access to all customer data and make use of notes and reminders to ensure customer needs are met.

Electronic Funds Transfer
The Spire Electronic Funds Transfer (EFT) feature allows for a faster method to make and receive payments, while increasing payment security and reducing processing costs.

General Ledger
The General Ledger module includes features to track and report on business performance. Get quick access to critical financial data with filters and make informed decisions to manage your business more effectively.

Job Costing
The Job Costing module is fully integrated with other modules so that revenue and expenses are posted to a specific job to compare with estimates and calculate profit.

Inventory
The Inventory module allow users to accurately store and maintain detailed records of inventory items. Get real-time data and gain tighter inventory control with robust features that help optimize inventory levels.

Multi-Currency

The Multi-Currency module makes it easy to manage multiple currencies. Foreign currency is automatically converted to the base currency for each transaction with currency gains/losses tracked in the General Ledger.

Price Matrix

The robust Price Matrix module provides a comprehensive custom pricing feature that allows for multiple pricing variations based on specific criteria.

Point of Sale

Manage all of your sales transactions from a single interface with the Point of Sale module. Features include quick processing and support for multiple payment methods.

Purchase History

The Purchase History module will save you time by enabling you to quickly access previous purchase orders and find the information you need with custom filters and searches.

Purchase Orders

Manage all aspects of your purchase orders with the Purchase Order module. Automatically generate new purchase orders from shortages and requisitions or easily create a new one by copying an existing order.

Requisitions

The Requisition module automates the purchase request and approval process to eliminate manual entry and costly mistakes.

Sales History

Make better business decisions with the Sales History module. Get up-to-date information by creating custom reports using filters and searches.

Sales Orders

The Sales Order module allows for greater flexibility and control over the order entry process. Users can access customer information from the order entry screen, including shipping information, history, open orders, account balance and credit status.

Vendors

The Vendor module will store all of your vendor data and provides quick access to purchase history, vendor balance, aging and credit information.

Add-ons

Extend the core functionality of Spire and make it easier to grow your business.

Payroll

Canadian businesses can now simplify their payroll processing with automatic calculation of provincial and federal deductions. Designed with an intuitive interface, the Spire Payroll add-on allows you to easily view employee earnings, benefits, deductions and taxes from one screen.

Production Manager

The Production Manager add-on lets you control inventory with pinpoint accuracy, reduce unplanned expenses and improve cash flow. Efficiently plan production from beginning to end and track progress with real-time information on raw materials, costs and production status.

Service Manager

The Service Manager add-on will help improve customer satisfaction and increase the efficiency of your service business. This add-on gives you quick access to all service records, making it easy to track the service history of each piece of equipment your customer owns.

User Defined Fields

User Defined Fields allows you to add custom fields so that you can capture specialized information. Custom fields can be added to different modules throughout Spire and can be set as text, numeric, date, dropdown lists or checkboxes.
